## Rail Transport Solutions

SADA Group's Glenlee Rail Siding provides a unique opportunity for goods distributors and rail providers, offering access to a private rail siding just south of the Sydney Metro passenger network which is outside the Sydney curfew area and offers highly flexible hours of operation.

SADA's Glenlee Rail Siding combines the convenience of direct north and south access onto the main north/south rail line running between Brisbane, Sydney and Melbourne, along with 3 kilometres of privately owned rail, several 'run around' points to enable shunting and the convenience of on-site refuelling services to clients.

Currently used extensively by Queensland Rail for marshalling and refuelling of their container freight services, SADA's Glenlee Rail Siding offers immediate benefits to companies requiring rail siding facilities close to Sydney and will soon offer even more.

Expansion plans underway at Glenlee include facilities for the loading and unloading of bulk goods, container freight options and further servicing provisions for rail operators.

Offering a wealth of experience both in mine operation and in servicing the many needs of mining companies, SADA prides itself on being proactive in response to client requirements, with a quick decision making process born from years in the business. We understand projects from our clients' perspective and draw on our own knowledge and experience to think beyond the immediate and deliver trouble-free, seamless, integrated solutions on every project we undertake.
